

SECURING BUSINESS AROUND THE WORLD

delivering secure solutions

design

Is your supplier delivering the right solution for you?

Need a supplier that can solve your integration issues?

concept

Integrated solutions from TSSI - the smart choice!

integration

Software from Microsoft, readers from HID, PCs from DELL and it still doesn't work! Ever wanted an integrated solution? Want to find a company that integrates its access control, ID card production and biometrics in one scalable solution? And offers support and consultancy?

At TSSI, we don't believe you should have to enter data twice, nor do we believe in asking staff to take two pictures of the same person. Our solutions share data and assets seamlessly, saving you time and money.

training

Whether you require a full access control system or just one biometric reader, our dedicated team will make "it" work.

helpdesk

At TSSI we develop the software, we build the hardware and we design the databases. Of course they'll work together!

developing your solutions

At TSSI we understand our products. We design them after all! Maybe you need to integrate your access control or ID card system into third party applications. At TSSI, our project consultants have an in depth understanding of technology and its commercial application. They will work with you, providing consultancy, requirements analysis and project management. We will ensure that we deliver the solution to meet your needs within time and budget, resulting in an increased return on investment.

Some of the integration projects we've completed:

- **Automotive** - Biometric security for CIT vehicles
- **Banking** - Biometric security solutions
- **Defence** - Access control & ID solution
- **Healthcare** - Bespoke time management
- **Government** - Smart card solutions
- **Local Govt** - Housing solutions
- **Nurseries** - Biometric security solutions
- **Overseas Govt** - Immigration/border control
- **Retail** - Loss prevention
